Biometric Systems: Technology, Design and Performance Evaluation

Biometric Systems: Technology, Design and Performance Evaluation

Biometric Systems provides practitioners with an overview of the principles and methods needed to build reliable biometric systems. It covers three main topics: key biometric technologies, design and management issues, and the performance evaluation of biometric systems for personal verification/identification. The four most widely used technologies are focused on - speech, fingerprint, iris and face recognition.

Key features include: in-depth coverage of the technical and practical obstacles which are often neglected by application developers and system integrators and which result in shortfalls between expected and actual performance; and protocols and benchmarks which will allow developers to compare performance and track system improvements.

From reader reviews:

Nathan Wilson:

What do you think about book? It is just for students since they are still students or this for all people in the world, the actual best subject for that? Merely you can be answered for that query above. Every person has various personality and hobby for each other. Don't to be pushed someone or something that they don't wish do that. You must know how great as well as important the book Biometric Systems: Technology, Design and Performance Evaluation. All type of book can you see on many options. You can look for the internet resources or other social media.

Kyle Coffman:

Book is to be different for every grade. Book for children until finally adult are different content. As we know that book is very important usually. The book Biometric Systems: Technology, Design and Performance Evaluation had been making you to know about other knowledge and of course you can take more information. It is very advantages for you. The book Biometric Systems: Technology, Design and Performance Evaluation is not only giving you far more new information but also for being your friend when you experience bored. You can spend your own spend time to read your book. Try to make relationship with all the book Biometric Systems: Technology, Design and Performance Evaluation. You never really feel lose out for everything if you read some books.

Megan Lapointe:

Nowadays reading books become more and more than want or need but also work as a life style. This reading behavior give you lot of advantages. The benefits you got of course the knowledge your information inside the book which improve your knowledge and information. The data you get based on what kind of publication you read, if you want drive more knowledge just go with education and learning books but if you want feel happy read one along with theme for entertaining such as comic or novel. Often the Biometric Systems: Technology, Design and Performance Evaluation is kind of reserve which is giving the reader capricious experience.

Debra Treat:

Exactly why? Because this Biometric Systems: Technology, Design and Performance Evaluation is an unordinary book that the inside of the guide waiting for you to snap that but latter it will distress you with the secret the item inside. Reading this book alongside it was fantastic author who all write the book in such amazing way makes the content inside of easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you for not hesitating having this anymore or you going to regret it. This book will give you a lot of rewards than the other book have got such as help improving your talent and your critical thinking way. So , still want to hold off having that book? If I were being you I will go to the publication store hurriedly.
