[(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004) David H. Hubel

Scientists' understanding of two central problems in neuroscience, psychology, and philosophy has been greatly influenced by the work of David Hubel and Torsten Wiesel: What is it to see? This relates to the machinery that underlies visual perception, How do we acquire the brain's mechanisms for vision? This is the nature-nurture question as to whether the nerve connections responsible for vision are innate or whether they develop through experience in the early life of an animal or human. This is a book about the collaboration between Hubel and Wiesel, which began in 1958, lasted until about 1982, and led to a Nobel Prize in 1981. It opens with short autobiographies of both men, describes the state of the field when they started, and tells about the beginnings of their collaboration. It emphasizes the importance of various mentors in their lives, especially Stephen W. Kuffler, who opened up the field by studying the cat retina in 1950, and founded the department of neurobiology at Harvard Medical School, where most of their work was done. The main part of the book consists of Hubel and Wiesel's most important publications. Each reprinted paper is preceded by a foreword that tells how they went about the research, what the difficulties and the pleasures were, and whether they felt a paper was important and why. Each is also followed by an afterword describing how the paper was received and what developments have occurred since its publication. The reader learns things that are often absent from typical scientific publications, including whether the work was difficult, fun, personally rewarding, exhilarating, or just plain tedious. The book ends with a summing-up of the authors' view of the present state of the field. This is much more than a collection of reprinted papers. Above all it tells the story of an unusual scientific collaboration that was hugely enjoyable and served to transform an entire branch of neurobiology. It will appeal to neuroscientists, vision sc

From reader reviews:

Kurt Gomez:

The book [(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004) can give more knowledge and information about everything you want. Why then must we leave the great thing like a book [(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004)? Wide variety you have a different opinion about book. But one aim that will book can give many facts for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or information that you take for that, you may give for each other; you could share all of these. Book [(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004) has simple shape but you know: it has great and large function for you. You can seem the enormous world by open up and read a reserve. So it is very wonderful.

William Johnson:

The e-book untitled [(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004) is the publication that recommended to you to read. You can see the quality of the publication content that will be shown to you actually. The language that writer use to explained their ideas are easily to understand. The copy writer was did a lot of exploration when write the book, and so the information that they share to you personally is absolutely accurate. You also might get the e-book of [(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004) from the publisher to make you far more enjoy free time.

Diane Walker:

Many people spending their time frame by playing outside along with friends, fun activity together with family or just watching TV all day every day. You can have new activity to invest your whole day by looking at a book. Ugh, you think reading a book can definitely hard because you have to take the book everywhere? It alright you can have the e-book, getting everywhere you want in your Cell phone. Like [(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004) which is obtaining the e-book version. So , try out this book? Let's find.

Jose Johnson:

As a pupil exactly feel bored for you to reading. If their teacher asked them to go to the library as well as to make summary for some e-book, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that studying is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's

country. Therefore this [(Brain and Visual Perception: The Story of a 25-Year Collaboration)] [Author: David H. Hubel] published on (October, 2004) can make you experience more interested to read.
