Excerpt from Diseases of the Rectum and Anus, Designed for Students and Practitioners of Medicine

The advances made in the domain of rectal surgery since the appearance of the first edition of this work have necessitated a complete revision and the addition of much new material. The chapters on "Cancer" and "Colostomy," which in the first edition were written by Mr. Herbert Allingham, have been entirely rewritten and considerably extended in the present edition by the author.

To render the volume more worthy of the title it bears, three entirely new chapters have been prepared, namely: "Diseases, Injuries, and Tumors of the Coccyx"; "Venereal Diseases of the Ano-rectal Region"; and "Recto-colonic Enteroliths and Concretions."

In order to more thoroughly elucidate the text, many new and original illustrations have been added to the already large number prepared for the first edition. These additions comprise five full-page colored plates, seventeen full-page black-and-white plates, and one hundred and one smaller engravings and half-tones. It will, therefore, readily be seen that the present volume is practically a new work.
