`History: Fiction or Science? Chronology 2` is the second volume of the most explosive and astounding tractate on history ever written - however, every theory it contains, no matter how unorthodox, is backed by rock solid scientific data. The book is easy and pleasant to read; it is well-illustrated, contains hundreds of charts, graphs and illustrations, copies of ancient manuscripts, and countless facts attesting to the falsity of the chronology used nowadays. You will be amazed to discover: - That the chronology universally accepted today and taken for granted is simply wrong; - That ALL methods of dating of ancient sources and artefacts known today are erroneous or non-exact; - That there is not a single document that could be reliably dated earlier than the XIth century; The Author refers to the Middle Ages as the "Antiquity" and proves mutual superimposition of the Second and the Third Roman Empire, both of which become identified as the respective kingdoms of Israel and Judah. Furthermore, he asserts that the famous reform of the Occidental Church in the XI century by "Pope Gregory Hildebrand" was the reflection of the XII century reforms of Byzantine emperor Andronicus who in his turn identifies with Jesus Christ. The Trojan war counted by Homer happened only as late as of the XIII century A.D. and the great poet actually lived in XIV century A.D. No stone in history of Antiquity is left unturned. Literally. This book is the beginning of a major correction to the chronology we live with.
