Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications Gary Miner, John Elder IV, Thomas Hill, Robert Nisbet, Dursun Delen, Andrew Fast

Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications brings together all the information, tools and methods a professional will need to efficiently use text mining applications and statistical analysis.

Winner of a 2012 PROSE Award in Computing and Information Sciences from the Association of American Publishers, this book presents a comprehensive how-to reference that shows the user how to conduct text mining and statistically analyze results. In addition to providing an in-depth examination of core text mining and link detection tools, methods and operations, the book examines advanced preprocessing techniques, knowledge representation considerations, and visualization approaches. Finally, the book explores current real-world, mission-critical applications of text mining and link detection using real world example tutorials in such varied fields as corporate, finance, business intelligence, genomics research, and counterterrorism activities.

The world contains an unimaginably vast amount of digital information which is getting ever vaster ever more rapidly. This makes it possible to do many things that previously could not be done: spot business trends, prevent diseases, combat crime and so on. Managed well, the textual data can be used to unlock new sources of economic value, provide fresh insights into science and hold governments to account. As the Internet expands and our natural capacity to process the unstructured text that it contains diminishes, the value of text mining for information retrieval and search will increase dramatically.

-Extensive case studies, most in a tutorial format, allow the reader to 'click through' the example using a software program, thus learning to conduct text mining analyses in the most rapid manner of learning possible

-Numerous examples, tutorials, power points and datasets available via companion website on Elsevierdirect.com

-Glossary of text mining terms provided in the appendix

From reader reviews:

Janet Maldonado:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each reserve has different aim or perhaps goal; it means that reserve has different type. Some people feel enjoy to spend their time for you to read a book. They are really reading whatever they acquire because their hobby is actually reading a book. Think about the person who don't like studying a book? Sometime, person feel need book when they found difficult problem as well as exercise. Well, probably you will want this Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications.

Rosa Rogers:

Would you one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you find out the inside because don't ascertain book by its include may doesn't work at this point is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer is usually Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications why because the wonderful cover that make you consider with regards to the content will not disappoint a person. The inside or content is fantastic as the outside or maybe cover. Your reading 6th sense will directly direct you to pick up this book.

Darryl Payton:

The book untitled Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications contain a lot of information on this. The writer explains the woman idea with easy way. The language is very easy to understand all the people, so do not really worry, you can easy to read the item. The book was published by famous author. The author brings you in the new period of literary works. You can read this book because you can continue reading your smart phone, or program, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official website and also order it. Have a nice go through.

Katherine Adkins:

Beside this specific Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications in your phone, it can give you a way to get nearer to the new knowledge or info. The information and the knowledge you are going to got here is fresh in the oven so don't always be worry if you feel like an outdated people live in narrow town. It is good thing to have Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications because this book offers to your account readable information. Do you occasionally have book but you rarely get what it's interesting features of. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, similar to

treasuring beautiful island. Techniques you still want to miss the item? Find this book as well as read it from right now!
