Table Manners for Beginners: A Civilized Introduction to the Ross Periodic Table Jim Ross

The Ross Lattner Intuitive Chemistry series is different! The Ross Periodic Table is a powerful new way to approach the periodic table, aimed at high school students in their first chemistry course. Students will learn three simple concepts, and apply them to an astonishing number of chemical phenomena. With these concepts, they will accurately predict and explain the behavior of the elements covered in introductory chemistry courses. These concepts will form a strong foundation for all the chemistry you'll teach in high school. Your students will gain a level of fluency that is not possible using other approaches. As teachers and parents know, personal competency is the only reliable foundation for building self esteem and confidence. • Compatible with the emerging consensus on the nature of science. • Works with, not against, students' natural cognitive growth. • Integrates language with learning
