## **Building Your Kevlar Canoe: A Foolproof Method and Three Foolproof Designs** James Moran

Kevlar is a strong (40% stronger than fiberglass) material, perfect for building light-weight (35 pounds for a 17-foot canoe), fast, maintenance-free canoes. The only problem with Kevlar canoes is their cost--\$2,000 or more. With this book, the most inexperienced home builder can turn out a handsome canoe for an investment of about \$600 and a few weekends. The principal tools needed are a sharp pair of scissors and a \$5 hand plane--and the method is astonishingly easy and forgiving. Featured are designs for a stable family canoe, a solo canoe, and a wilderness tripper, any of which can be built right from this book.
