### The Oxford Companion to the Mind

With 1001 A-Z entries, ranging from brief statements to substantial essays on major topics, *The Oxford Companion to the Mind* takes the reader on a lively tour of this endlessly fascinating subject, spanning questions and answers within the broad compass of philosophy, psychology, and the physiology of the brain. This hugely-popular reference work offers an explanatory guide to everyday mysteries--deja vu, jet-lag, humor, and optical illusions--as well as an intelligent look at the more controversial world of parapsychology, including ESP and altered states of consciousness. Current issues such as aging, artificial intelligence, and criminology are examined in depth. The book provides a special tutorial article on the workings of the nervous system, and boasts a great number of articles on 'topics of mental life', in which well-known writers discuss subjects in which they have a particular expertise or interest.

The entries are arranged alphabetically and linked by a network of helpful cross-references. The 200 illustrations have been carefully chosen to amplify the text, while specialist bibliographies provide suggestions for further reading. The whole work is served by a comprehensive index, making this a Companion for instant reference as well as continuous reading.
