Star Children: Understanding Children Who Set Us Special Tasks And Challenges Georg Kuhlewind
'While working on this book the following happened to me: As I checked in at the airport in Hamburg a young couple was in front of me, and the mother had a three-to-four-month old baby in her arms. All of a sudden the baby turned round, looked me straight in the eye, and I was deeply shaken; for that was not the look of a baby but of a very self-aware adult, a wise one, and he appeared to see right through me...' Who are the 'star children'? In recent years there has been much written about 'gifted' children with special abilities ('indigo children', 'crystal children', etc.). Such children, it is said, are coming to earth to help humanity in its development. Based on extensive research, Georg Kuhlewind confirms that this new generation has been incarnating among us for the past couple of decades. This event, he states, is one of the most important of our age. Unlike many other contributors to this debate, Kuhlewind gives us the necessary background with which to follow experientially what he has to say. He takes us consciously, scientifically, into the realm from which we all enter the world as babies, 'trailing clouds of glory...'. We all possess the tools he describes for taking this path: our thoughts, our heart forces and our willpower. By using these faculties with our full attention, by focusing our attentiveness and eliminating everything else, we can enter the realm of the spirit where laws differing from those on earth prevail. The author aids us on this path by closing each chapter with themes for contemplation and meditation. Star Children is a compelling addition to the literature on the theme of 'special' children, and offers a unique perspective based on spiritual-scientific discipline and research.
