Make compliance with the Uniform Building Code a cinch with this complete set of project-oriented checklists. They decode the often arcane and unwieldy requirements of the UBC and reduce verification of code compliance to the simple act of running through a checklist. No matter what stage your project is in or what type of structure you're working on, this resource provides the needed time-saving, code-verifying tool. Divided into four major sections, this book/CD package gives you checklists for the design stage, architectural documentation, structural documentation, and specifications. Provided in both print and computer-ready format, these checklists simplify record-keeping as well as compliance. This valuable tool reduces the need for time-wasting design changes, expensive construction change orders, and worseÑclaims that can result from failure to design and build according to code. Concise and easy to read and to use, the Uniform Building Code Manual is your key to quick and complete verification.
