Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics)

Rudolf v.B. Rucker

Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics) Rudolf v.B. Rucker

This is a highly readable, popular exposition of the fourth dimension and the structure of the universe. A remarkable pictorial discussion of the curved space-time we call home, it achieves even greater impact through the use of 141 excellent illustrations. This is the first sustained visual account of many important topics in relativity theory that up till now have only been treated separately.

Finding a perfect analogy in the situation of the geometrical characters in *Flatland*, Professor Rucker continues the adventures of the two-dimensional world visited by a three-dimensional being to explain our three-dimensional world in terms of the fourth dimension. Following this adventure into the fourth dimension, the author discusses non-Euclidean geometry, curved space, time as a higher dimension, special relativity, time travel, and the shape of space-time. The mathematics is sound throughout, but the casual reader may skip those few sections that seem too purely mathematical and still follow the line of argument. Readable and interesting in itself, the annotated bibliography is a valuable guide to further study.

Professor Rucker teaches mathematics at the State University of New York in Geneseo. Students and laymen will find his discussion to be unusually stimulating. Experienced mathematicians and physicists will find a great deal of original material here and many unexpected novelties. Annotated bibliography. 44 problems.

From reader reviews:

Brandy Greenawalt:

As people who live in typically the modest era should be up-date about what going on or information even knowledge to make all of them keep up with the era and that is always change and advance. Some of you maybe will update themselves by looking at books. It is a good choice in your case but the problems coming to a person is you don't know what type you should start with. This Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics) is our recommendation to make you keep up with the world. Why, because book serves what you want and wish in this era.

Lillian Owensby:

Precisely why? Because this Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will jolt you with the secret this inside. Reading this book close to it was fantastic author who write the book in such remarkable way makes the content on the inside easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of rewards than the other book have such as help improving your ability and your critical thinking method. So , still want to postpone having that book? If I had been you I will go to the book store hurriedly.

Donnie Matthews:

Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics) can be one of your nice books that are good idea. All of us recommend that straight away because this reserve has good vocabulary which could increase your knowledge in words, easy to understand, bit entertaining but still delivering the information. The author giving his/her effort to get every word into enjoyment arrangement in writing Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics) but doesn't forget the main place, giving the reader the hottest in addition to based confirm resource details that maybe you can be one among it. This great information may drawn you into brand new stage of crucial considering.

Selma Lang:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book had been rare? Why so many concern for the book? But any people feel that they enjoy to get reading. Some people likes examining, not only science book but novel and Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics) as well as others sources were given know-how for you. After you know how the good a book, you feel desire to read more and more. Science book was created for teacher or maybe students especially. Those ebooks are helping them to put their knowledge. In additional case, beside science guide, any other book likes Geometry, Relativity and the Fourth Dimension (Dover Books on Mathematics) to make your spare time far more colorful. Many types of book like this one.
